PROJECTS

- **RFID BASED ATTENDANCE MANAGMENT SYSTEM**
- I have done in my last year of bsc it one project using python and django framework.

RFID based attendance management system in this project An RFID-based attendance system makes use of RFID technology to mark employee's attendance before every lecture in the institute. The employee have to use an RFID tag to mark their presence on the RFID reader. The data is stored in the attendance system with high accuracy and efficiency.

- **Quiz app**
- This is a simple and interactive quiz application built with HTML, CSS, and JavaScript. The app allows users to test their knowledge with multiple-choice questions and tracks their score throughout the quiz
- **Features**
- Multiple-choice questions
- Randomized question order
- Score tracking
- Feedback on correct and incorrect answers
- Restart option to retake the quiz
- Skills: JavaScript

- **GYM MANAGEMENT SYSTEM**
- Developed a comprehensive Gym management System using C# and a connected database
- Admin login Secure administrator login to protect sensitive data
- Member Management: functionality to add, edit, delete and view member
- details Payment Module Enabled tracking of member payment with options to payment with options to mark payments as received, specify amounts, and add relevant payment details
